## TANTRA TAKES OVER EUROPE!

Tantra, a meditative **Culture** will be more popular than any Pc-Games or other things that young people are interested in these days.

Even more young people want to awake the "Holy **Life-energy**" in their souls.

Only meditation and a lot of concentration can help them to get a holy Chi, or also sayd Chakra.

With Joss-Sticks and Candles they produce a powerfull atmosphere in their rooms.

Some of the youths think they can see ghosts of old Zen-Masters.

## Apple Iphone

The Apple Company has made a new Iphone with 16 Gb. The Iphone has W-Lan, Bluetooth, Camera and a very good music-player. The Iphone costs in Germany 560 €. But you can buy it cheaper with a Mobile phone contract. But you pay 100 € first and then 15 € by month and every

month you must call people for 50€. The best way is to buy it, that's cheaper.

## Nightlife + Music

Some teenagers write on the internet that the popular metal band, Slipknot, will come on the 12<sup>th</sup> April 2008 (Saturday) at 8pm to Göppingen (Germany).

They will play at the Freihof Gymnasium. But is this really true? Why should such a popular band come to such a small town, and why did nobody know about it earlier?

There's no tour or anything of the sort so I really don't believe it!

## Sport:Football

Today is Champions League time.

The two matches today are Chelsea London-Fenerbache Istanbul and Arsenal-Liverpool.

Let's talk about the first match Chelsea vs. Fener it looks like an unequal match but if Fener plays concentrated and aggressive a merricul could happen.

In the second match it's very equal, there maybe the keepers will be the reason for victory.

## About the company

S\*\*\*\*\* M\*\*\*\* Wheels

- First use of spoket wheels with fabricated alloy rims in the 30s and 50s for races
- 1979 first series of production of fabricated light alloy wheels for export of Mercedes Benz cars.
- Since 1995 mass production fro BMW
- The difference of weight versus the steel wheels is about 30%. This improves the road performance and the comfort of the car due to reduction of "not-suspendec masses".
