

# 25 | I'd like an ice cream, please

Solutions for English Teaching
Reward Elementary

Resource Pack

fold fold **%** Medium?

## I'd like an ice cream, please Worksheet 25

#### **ACTIVITY**

Whole class: speaking Mill drill (For detailed instructions and advice on using mill drills, see the notes for teachers at the beginning of the

Resource Pack.)

#### **AIM**

To speak to as many partners as possible, asking what people would like and making polite requests.

### **GRAMMAR AND FUNCTIONS**

Offers and requests

Would like

Asking and saying how much things cost

#### **VOCABULARY**

Food and drink

#### **PREPARATION**

Make one copy of the worksheet for each group of up to ten students. Cut the worksheet up into cards, being careful to cut and fold as indicated. You will need to keep one card for yourself to demonstrate the activity.

#### TIME

15 minutes

#### **PROCEDURE**

As this is a controlled practice activity, it is essential that the students are familiar with the vocabulary before doing the mill drill. It is a good idea to use the pictures on the mill drill cards to revise or pre-teach the vocabulary the students will need for this activity:

> Food and drink Choice of size, flavour, etc an ice cream strawberry or chocolate?

some french fries regular or large? some water or sparkling or still?

a glass of water

some coffee or black or white?

a cup of coffee

some apple pie or with cream or ice cream? a piece of apple pie

a burger with fries or salad? a Coke regular or large?

a salad with vinaigrette or mayonnaise? (with) white or brown bread? a sandwich a steak medium or rare?

- If there are more than ten students in the class, divide them into groups. Give one folded picture card to each student in the class. Keep one for yourself.
- Make sure each student knows how to say the food or drink shown in the picture on their card. In particular, make sure they know which article to use (a, an or some).

Tell the students that they are going to ask for the food or drink shown on their cards. Write an example dialogue on the board, indicating the language the students should use. For example:

Student A: Can I help you?

Student B: I'd like an ice cream, please.

Student A: Would you like strawberry or chocolate?

Student B: Chocolate, please.

- 5 Demonstrate the activity with individual students, using the card you kept for yourself. Tell the students to hold their cards so that the picture showing the food or drink is facing them and the picture showing the choice of size, flavour, etc is facing their partner. Ask several pairs of students to demonstrate the activity to the whole class, using their pictures as prompts.
- Now ask the students to go round the class or group making requests and offering choices with as many different partners as possible, using their picture cards as prompts. In this part of the activity, the students request the same food or drink, but offer different sizes, flavours, etc.
- 7 When the students have finished, ask them to exchange cards and to go round the class or group again, this time holding their cards the other way round so that the picture showing the food or drink is facing their partner and the picture showing the choice of size, flavour, etc is facing themselves. In this part of the activity, the students ask for different food or drink each time they change partner.
- The students continue making requests and offering choices in this way until they have spoken to as many different partners as possible.

### OPTION

You can extend the dialogue so that the students practise asking and saying how much things cost. Before they start the activity, ask them to write the price of the food or drink on the part of the card showing the choice of size, flavour, etc. You can help them to decide how much these things usually cost. When all the students have done that and you have checked that they have put an appropriate price on their cards, follow the procedure as above, adding the following lines to the sample dialogue:

Student A: Here you are.

Student B: Thank you. How much is that?

Student A: That's 99p.

Alternatively, the students can practise this three-line dialogue in a separate mill drill. Cut off the part of the cards showing the choice of size, flavour, etc and use the pictures of food and drink as mill drill cards. Ask the students to write the price of the food or drink shown on their cards on the blank side. Follow the procedure for a mill drill with students holding the cards with the pictures of food and drink facing them and the price facing their partner for the first part of the activity, and then holding the cards the other way round for the second part of the activity.
