Digital presentation tools—Elementary
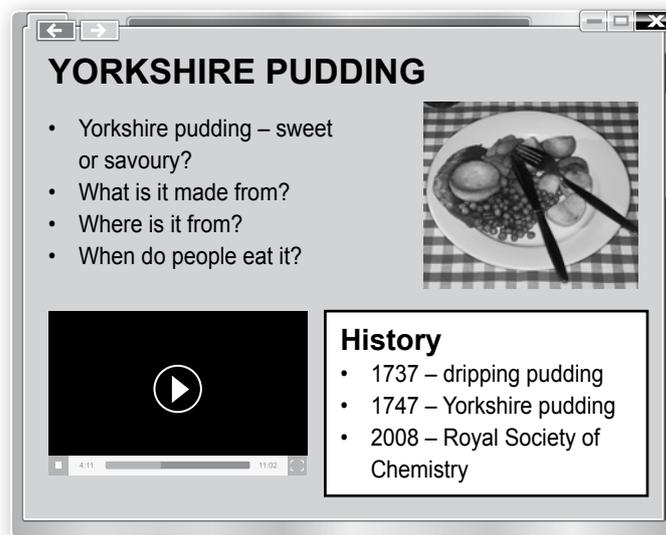

Let's discuss

A **Read the text and answer the questions.**

> There are lots of **digital presentation tools** which allow you to make dynamic and interactive presentations and save them online. Animation, music, videos, sound and links can be added too. This makes the presentation more interesting and attractive. Many of these tools also allow you to collaborate and share your presentation with others. An advantage of using a digital presentation tool is that you can add your finished product to your blog or wiki. Since the presentation is saved online, you can share a link to it at the click of a button.

1. What digital presentation tools do you know?

2. What are the advantages of using a digital presentation tool?

Let's analyse

B **Look at the presentation. Answer the questions in groups.**

1. What do you think this presentation is about?

2. What can we expect to see in the presentation?

3. What is the function of the bullet points?

4. Are photos an important part of a presentation? Why?

Worksheet

GLOSSARY

Bullet points: A useful way of putting short bits of information on the screen that you can talk more about in your presentation.

Slide: A page of your digital presentation – many slides make up a presentation.

Let's do it!

Step 1 Go online and choose a digital presentation tool.

Step 2 Choose a recipe to talk about in your presentation. Select something that you like and that you can make yourself at home!

Step 3 Think about what to include in your presentation (text, audio, video). Remember to list all of the ingredients and to express the quantities (a lot, some, a, an, a cup, a teaspoon).

Step 4 Create your presentation using the following structure:
- Title
- Ingredients
- Steps
- Tips

Step 5 Decide which information to put on each slide.

Step 6 Save your presentation and share the link with your teacher and classmates.
