

Pre-Intermediate – Be careful with money

A. You are on a school trip to a museum. You've got £10 to spend. You are very hungry and want to buy some lunch. You also want to get something from the museum shop. Sandwiches are £3, a hot dog is £4, and a bag of crisps is £1. Fruit juice is £2, milk is £1, and water is free.

Decide how to spend your money so you have some left to buy a souvenir.

B. You are in a shop. You want to buy a pen for £1, a book for £2.75, a comic for £1.50 and a rubber for 50 cents. You give the shop assistant £10.

Decide how much change the shop assistant needs to give you.

C. It's your teacher's last day and you want to buy him a present. Some other students want to buy presents too. You can buy a present together!

Decide how much you want to spend, how much money each person needs to give and what you will buy.

Reflection Point

It's important to be careful with money. Know how much you've got and how much you need... and always check your change.
