Red Words and Stars

The Red Words and Stars are one of **Macmillan Dictionary's** most popular features. This booklet explains what they are, how they can be used and provides a selection of resources for the classroom.

What are they?

Although the English language has up to a million words, native speakers use just 7,500 words for 90% of what they speak or write. These words represent the core vocabulary of English, and they are words that everyone needs to be able to use with confidence. They appear in **red** in Macmillan Dictionary, along with a star rating. Three-star words (★ ★ ★) are the most common 2,500 words in the language. Two-star words (★ ★) are the next most common group, and one-star words (★) are the next most common 2,500.

Watch our video about the Red Words & Stars

How can you use them?

Red words are described in detail, with information provided not only about meaning, but also about grammatical behaviour, word combinations (collocation), register (informal, literary etc.) and pragmatics (what the words say about the speaker's attitude). These features are often illustrated with examples taken from our corpus to show typical contexts, collocations and grammatical patterns.

All this information is carefully selected and presented in order to help people to use the word accurately and appropriately.

What about the less common words?

Low-frequency words are mostly needed for reference and appear in **black** in Macmillan Dictionary. Students will need to know what these words mean, but might not need to reproduce them when speaking or writing.

These words have just a simple definition to help you understand the meaning straight away.

Did you know?

The aim of Macmillan Dictionary is to make every definition as clear and easy to understand as possible. To achieve this, we write the definitions using a special **defining vocabulary** of just 2,500 words. These are among the most frequent words in the English language, and they are words that all students of English become familiar with in the first year or two of their studies.
